

DOT-DASH[®] SIGNAGE / INSTALLATION

VP PEDESTAL SIGN

The VP Pedestal Sign is designed with an adjustable snap on/off base to position the name plaque in a vertical display position (above the line of sight) or at a 20 degree personal, desk position (below the line of sight).

To change the position of the name plaque, squeeze the base portion of the mount at both sides disengaging the internal side snaps and pull. Turn the base 180 degrees and snap it back into the cap.

Location tabs at the front and back assure proper alignment of the base to the cap.

Installing the plaque: Hold the plaque against the shoulder of the dot and turn the dot cap and washer tightly against the plaque (rubber side of washer against plaque).
