

# ALUMINUM GROUP OUTSERT® SIGNAGE TOP PANEL/XSITE- INSTALLATION INSTRUCTION

Remove top fabric tile of the panel by pushing up on the tile and swinging the bottom of the tile out. Bracket is placed on the top edge of the tile as shown. Hold the bracket against the face of the panel and slide the tile with the bracket up into the top tile channel of the frame. Swing the bottom edge of the tile in and push down. Due to the tight fit of the tile into the channel, the bracket (with the sign attached) may need to be pulled down or adjusted for proper fit. The top channel will hold the bracket firmly in place.
