

## DOT-DASH<sup>®</sup> SIGNAGE / INSTALLATION TOP/SIDE OF PANEL MOUNT - HAWORTH PREMISE

The bracket clips on either side or the top of the panel. A #6 x 1/2 black screw (included) is used to secure the bracket to the panel. There are two (2) options for installing the screw:

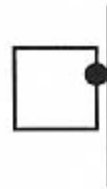

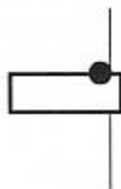

- #1 - against the back of the bracket, guided by the slot in the bracket into the fabric trough.  
or
- #2 - for a more secure installation, drill a 7/64" hole in the side/top of the panel, through the fabric and metal and install screw through the hole provided in the bracket into the drilled hole.

The back half of the dot is attached to the bracket with a #8-32 x 5/8" flat head screw. A 3/32" allen wrench (provided) is required to loosen or tighten the screw. By rotating the dot with this screw loose, plaque can be positioned as shown:

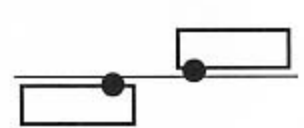

LEFT SIDE OF PANEL

RIGHT SIDE OF PANEL

TOP OF PANEL

The screw holding the back half of the dot to the bracket **must be firmly tightened** to hold the dot and the plaque in desired position.

Hold plaque against shoulder of dot and turn cap and washer tightly against plaque (rubber side of washer against plaque).
