

## Operation Instructions Magnetic Window

1730 LINCOLN AVE www.appenx.com 616 396 6216 HOLLAND MI 49423 appenx@appenx.com 800 443 6032

A MAGNETIC WINDOW can cover an entire sign or any portion of a sign, due to this being a single unit that slides into the module assembly. Neodymium magnets, hidden behind the top trim, secure the lens. Opening the lens requires a suction cup tool. Paper insert, graphic or clear acetate insert can be simply "dropped" in or pulled out. Closing the lens is easily done, by allowing the magnets to snap it back into place.

The designs, details and plans represented on these renderings are the property of Appenx, Inc. They were created for the project being designed and quoted by Appenx, Inc. for the sole purpose of your viewing and approval. These renderings are not to be shown to anyone outside of your organization or to be used by any other company for reproducing, quoting or design of signage for this and/or other projects. All or any parts of this design remain the property of Appenx, Inc. Specifications, signed-off by the customer and entered as an order, are firm and final 24 hours from the time the order is acknowledged (i.e. released to production). Changes to the specifications/order after the 24 hours are subject to a minimum \$25 charge.
